

VV-100 stands for a low cost, high performance vacuum venturi, that's produced by ICH. The venturi gives a high vacuum level, till 90% (at +/- 6bar).

The venturi is made from anodised aluminium the internal parts are from brass. The venturi has no moving parts, this makes it very reliable and also gives it a high durability

This venturi can be used for: pick and place applications, the evacuation of moulds, the finding of leakages and so on.

Article code:	VV-100-12H
Vacuum level:	80~90%
Vacuum flow:	45 NL/min
Air consumption:	60 NL/min
Vacuum port:	G1/2(female)
Pressure port:	G1/4(female)
Exhaust port:	G1/4(female)
Dimensions:	50*40*28 (mm)
Material body:	Aluminium
Material jetpipe & nozzle:	Brass
