

- > **Port size:**
1/4" (ISO G or NPT),
NAMUR Interface
- > **Main application:**
Single and double
acting actuators
- > **5/2 way valve usable**
as 3/2 way valve
- > **Crossover-free**
switching
- > **Manual override with**
detent
- > **Variable valve solenoid**
combination

Technical features

Medium:

Filtered, lubricated or non-lubricated and dry compressed air

Operation:

Indirect solenoid operated spool valve

Operating pressure:

2 ... 8 bar (29 ... 116 psi)

Orifice:

6 mm

Port size:

G1/4, 1/4 NPT

3 and 5: G1/8, 1/8 NPT

NAMUR Interface with integrated recirculation from the exhaust air to the actuator spring chamber

Flow direction:

Fixed

Mounting position:

Optional

Ambient/Media temperature:

-15 ... +50°C (5 ... +122°F)

Air supply must be dry enough to avoid ice formation at temperatures below +2°C (35°F).

Materials:

Housing: Aluminium anodized

Pilot flange: Plastic (PBT)

Flange plate: Aluminium

Seals: NBR

Flow conversion:

Cv US Gallon/min (water) =

l/min (air) x 0,001

Kv m³/h (water) =

l/min (air) x 0,000906

Solenoid actuators for intrinsically-safe circuits

	Nominal resistance RN coil (Ω)	Min. required switching current (mA)	Resistance R _w 60 coil (Ω)	Required voltage at terminal R _w 60 (V)	IP Protection class	Ex-Protection (ATEX-Category)	Temperature Ambient/ Media (°C)	Weight (kg)	Drawing No.	Circuit diagram No.	Model
	275	37	345	13,8	IP65 (with connector)	II 2 G Ex ia IIC T6/ T4 Ga	T6: -40 ... +50 T4: -40 ... 85	0,2	15	13	3039

When selecting an intrinsically safe power supply, the permissible maximum values according to the Certificate of Conformity should be taken in account.

On the other hand, the low effective inductivity and capacity can be ignored.

Connector DIN EN 175301-803 form A is not scope of delivery,, see table »Accessories«

Warning

These products are intended for use in industrial compressed air systems only. Do not use these products where pressures and temperatures can exceed those listed under »**Technical features/data**«.

Before using these products with fluids other than those specified, for non-industrial applications, life-support systems or other applications not within published specifications, consult IMI Precision Engineering, Norgren GmbH.

Through misuse, age, or malfunction, components used in fluid power systems can fail in various modes. The system designer is warned to consider the failure modes of all component parts used in fluid power systems and to provide adequate safeguards to prevent personal injury or damage to equipment in the event of such failure.

System designers must provide a warning to end users in the system instructional manual if protection against a failure mode cannot be adequately provided.

System designers and end users are cautioned to review specific warnings found in instruction sheets packed and shipped with these products.
